OpenVPN Installation Guide for Android

1. Install the OpenVPN app from the Play Store.
2. Input the URL for our VPN: openvpn.ias.edu and click the “Next” button.
3. Enter your IAS username and your password, and hit Import. (You do not have to type anything in “Port” or check either of the boxes.)
4. A box will pop up, prompting you to enter a passcode or type “push.” Make sure you have Duo installed on your device and set up with the IAS. Instructions to do so can be found [here](#). Then type “push” in the box and click the “Send” button.

You should get a notification on Duo. Go to the Duo app and select the “approve” button.
5. You will then be returned to the main screen of the OpenVPN app, listing your new profile. Click the profile, enter your password, and press OK.
6. A connection request will pop up. Select the “Ok” button.
7. If a pop-up appears asking for a Duo passcode or “push,” follow the instructions in step 4.
8. OpenVPN is now set up and you are connected.
