## DAMAST - an interactive research environment

Prof. Dr. Dorothea Weltecke and Dr. Florian Jäckel  
Institut für Geschichtswissenschaften  
Humboldt-Universität zu Berlin

Damast is an interactive research environment for visualizing the multi-religious situation in the Islamic world from 600 to 1400 CE. For the first time, all the existing geographical and chronological data about communities of Dhimmis under Muslim rule have been gathered together into one Database. Over 8,300 pieces of evidence at more than 440 locations are part of the database. They are visualized on a map, a timeline and displayed in various tables. Various filters, such as time, location, religious community and source allow detailed inspection of the data. Results of the research remain

accessible as a report and can be referenced. Our presentation will introduce the research environment and the underlying concepts, explains some of its features - and its shortcomings.

**Register in advance for this event at <https://bit.ly/3SDY4ie>.**

After registering, you will receive an email containing information about joining the webinar.

**Friday, February 16, 12:00-1:00 pm (EST)**

Hosted by **Sabine Schmidtke** (School of Historical Studies, IAS)  
and **María Mercedes Tuya** (Digital Scholarship, IAS).
