

Photography and Audio/Video Recordings

In the course of normal business and activity on the Institute's campus, there is photography, video, and audio recording of lectures, social activities, events, and general campus life. Individuals (Members, employees, and all others) who are present on our campus are deemed to have authorized the Institute to use recordings of these events and activities in printed and electronic form (e.g., Institute website and publications) as determined appropriate by the Institute, without any explicitly documented consent, compensation, or attribution required or provided. Questions about this policy should be directed to the Communications Department.
