WAM 2016 Yearbook Curves, Loops, and Words in Geometry

Objectives: This is a compilation of activities and resources contributed by participants during the Women and Mathematics Program May 9-20, 2016. We hope this can serve as a mathematical and professional reference guide for women mathematicians around the country.

1 Mathematical Content and References

- 1.1 Moira Chas on Computer Driven Questions and Theorems in Geometry
 - Lecture Notes: Day 1 & 2, Day 3, Day 4.
 - Lecture Videos: Day 2, Day 3, Day 4.
 - Exercises: Review Session Problems, and Figures

• References:

- a) Topology of Surfaces by L. Christine Kinsey, 1993.
- b) Beginning Topology by Sue Goodman, 2005.
- c) Low-Dimensional Geometry: from Euclidean Surfaces to Hyperbolic Knots by Francis Bonahon, 2009.
- d) A Primer on Mapping Class Groups by Benson Farb and Dan Margalit, 2011.
- e) Mostly Surfaces by Richard Schwartz, 2011.
- f) Relations between Word Length, Hyperbolic Length and Self-Intersection Number of Curves on Surfaces by Moira Chas, 2015.
- g) The Goldman Bracket and the Intersection of Curves on Surfaces by Moira Chas, 2015.
- h) An Invitation to Topology: Curves and Surfaces by Moira Chas.
- i) Hitchin's notes on Geometry of Surfaces Chapters 1 & 4.
- j) Moira Chas' Women and Math page

• Mathematics of Crochet:

- a) Ideas about curvature and computing curvature of crocheted hyperbolic planes by Tony Phillips.
- b) Crocheing the Hyperbolic Plane by David Henderson and Daina Taimina, 2001.

1.2 Moon Duchin on Counting and Growth

• Lecture Notes:

Counting in Groups: Fine Asymptotic Geometry

• Lecture Videos: Day 2, Day 3, Day 4.

• Exercises:

Review Session Problems

• References:

- a) generatingfunctionology by Herbert Wilf, 1994.
- b) Topics in Geometric Group Theory by Pierre de la Harpe, 2000.
- c) How Groups Grow by Avinoam Mann, 2012.

1.3 Nancy Hingston on Closed Geodesics on Surfaces

• Lecture Notes:

Day 1 & 2, Day 3 & 4.

• Lecture Videos:

Day 1, Day 2, Day 3.

• Exercises:

Curves and Surfaces Problems with Figures, Geodesic Problems.

- References:
 - a) Linear Algebra Review

- b) Morse Theory by John Milnor, 1963.
- c) Riemannian Geometry by Wilhelm Klingenberg, 1995.
- d) Morse Theory, Closed Geodesics, and the Homology of Free Loop Spaces by Alexandru Oancea, 2014.

1.4 Nathalie Wahl on Structures on the Free Loop Space

• Lecture Notes: Day 1, Day 2, Day 3, Day 4.

• Lecture Videos: Day 1, Day 2, Day 4.

• Exercises: Day 1, Day 2, Day 3.

- References:
 - a) Cyclic Homology by Jean-Louis Loday, 1998.
 - b) String Topology and Cyclic Homology by Ralph Cohen, Kathryn Hess, and Alexander Voronov, 2006.
 - c) Introducting Homology

1.5 Other lectures on video

- Working with the Square Model of Random Groups by Yen Duong
- Some Elementary Remarks about Closed Complex Manifolds by Dennis Sullivan.

2 Women in Science Seminar and References

2.1 Chats

• How to Become a Liberated Mathematician in 13 Painful Years by Piper Harron

- Overlapping Identities by Piper Harron, Moon Duchin, and Yen Duong: There's lots of talk of professional development in math, which amounts to gradually getting more comfortable taking on an identity as a "mathematician" and negotiating the social worlds that come with that. Being a woman and a mathematician causes some complicated overlaps, and many of us have other identities to negotiate as well—some of us are parents, queers, people of color, first-generation students, and so on. This conversation is about navigating the intersections of our multiple personal and professional identities.
 - a) Identity: family background, sexuality, gender identification, race, ethnicity, geographic location, mental health, mobility.
 - b) Environment: how can we make a good culture in math, support/resources for students, role models, pressure from peers/program. What makes a toxic or bad environment? humiliation, neglect...
 - c) Normal: what it means, what it means to not be normal, connecting the first two things (aka being the only person with some identity in an environment)
 - d) Career: "jobs for women", filling a quota, self-segregation.

2.2 Panels

- Careers in Mathematics, from Academia to Industry by Lisa Carbone, Cindy Curtis, Helen Moore, Jo Nelson, Linda Ness, and Ana Rita Pires:
 - a) Research in Industry: A Great Career Choice by Jack Leeming, 2016.

- b) SIAM's Guide to Careers in Applied Mathematics.
- c) https://versatilephd.com/
- d) Free Webinars on Disease Modeling.
- Becoming an Academic Mathematician: Transitioning from Undergrad to Grad Student by Lisa Traynor and Erica Graham:

- a) GRE Advice for Graduate School Applicants.
- b) Annotated Bibliography on GRE and Its Predictive Validity for Graduate Student Success.
- Becoming an Academic Mathematician: Transitioning from Undergrad to Grad Student by Katrin Wehrheim:

- (a) Finding a Postdoctoral Position in Mathematics by Lauren Williams.
- (b) Tips for Writing a Research Proposal by Katrin Wehrheim.

2.3 Research Network

- AWM Research Collaboration Conferences for Women
- Microsoft Research funded Research Collaboration Conferences for Women

2.4 Travel Grants

- AMS Travel Grant Programs
- AWM Travel Grant Programs
- AWM-NSF Travel Grants
- IAS Child Care Fund for Women and Mathematics Participants

2.5 Career Development

- AMS Career Advice
- AWM Career Advice
- AWM Career Advice for Students

2.6 Literature on Gender Issues in STEM

- Annotated bibliography of work related to gender in science by Greg Martin.
- Imposter Syndrome:
 - a) Unmasking the Imposter by Karen Kaplan, 2009.
 - b) Power Posing: Brief Nonverbal Displays Affect Neuroendocrine Levels and Risk Tolerance by Dana Carney, Amy Cuddy, Andy Yap, 2010.
 - c) Your Body Language Shapes Who You Are by Amy Cuddy, 2012.
 - d) What Am I Doing Here? by Athene Donald, 2012.
 - e) Getting Away with It by Athene Donald, 2014.
 - f) Geek Feminism Wiki
- Stereotype Threat:
 - a) Some Effects of Proportions on Group Life: Skewed Sex Ratios and Responses to Token Women by Rosabeth Moss Kanter, 1977.
 - b) What's Good for the Goose Is Not Good for the Gander: Solo Status as an Obstacle to Occupational Achievement for Males and Females by Jennifer Crocker and Kathleen McGraw, 1984.

- c) Memory Deficits and Memory Surfeits: Differential Cognitive Consequences of Tokenism for Tokens and Observers by Charles Lord and Delia Saenz, 1985.
- d) Half a Minute: Predicting Teacher Evaluations from Thin Slices of Nonverbal Behavior and Physical Attractivemess by Nalini Ambady and Robert Rosenthal, 1993.
- e) Stereotype Threat and the Intellectual Test Performance of African Americans by Claude Steele and Joshua Aronson, 1995.
- f) The Effects of Proportional Representation and Gender Orientation of the Task on Emergent Leadership Behavior in Mixed-Gender Work Groups by Leonard Karakowsky and Jacob Siegel, 1999.
- g) A Threatening Intellectual Environment: Why Females Are Susceptible to Experiencing Problem-Solving Deficits in the Presence of Males by Michael Inzlicht and Talia Ben-Zeev, 2000.
- h) Solo Status, Stereotype Threat, and Performance Experiences: Their Effects on WOmen's Performance by Denis Sekaquaptewa and Mischa Thompson, 2003.
- i) Stereotype Threat, Inquiring About Test Takers' Ethnicity and Gender, and Standardized Test Performance by Lawrence Stricker and William Ward, 2006.
- j) Stereotype Threat in Applied Settings Re-Examined by Kelly Danaher and Christian Crandall, 2008.
- k) Problems in the Pipeline: Stereotype Threat and Women's Achievement in High-Level Math courses by Catherine Good, Joshua Aronson, and Jayne Ann Harder, 2008.
- 1) Fail or Flourish? Cognitive Appraisal Moderates the Effect of Solo Status on Performance by Judith White, 2008.
- m) Female Teachers' Math Anxiety Affects Girls' Math Achievement by Sian Beilock, Elizabeth Gunderson, Gerardo Ramirez, and Susan Levine, 2010.
- n) Sex and Science: How Professor Gender Perpetuates the Gender Gap by Scott Carrell, Marianne Page, and James West, 2010.
- o) Bias Persists for Women of Science, a Study Finds by Kenneth Chang, 2012.
- p) Science Faculty's Subtle Gender Biases Favor Male Students by Corinne Moss-Racusin, John Dovidio, Victoria Brescoll, Mark Graham, and Jo Handelsman, 2012.
- q) Sexist Attitudes: Most of Us Are Biased by Jennifer Raymond, 2013.

- r) Expectation of Brilliance Underlie Gender Distributions across Academic Disciplines by Sarah-Jane Leslie, Andrei Cimpian, Meredith Meyer, and Edward Freeland, 2015.
- s) ReducingStereotypeThreat.org
- t) First woman to run the Boston Marathon

• Combating Gender Bias:

- a) Why So Slow? The Advancement of Women by Virginia Valian, 1999.
- b) Reducing the Racial Achievement Gap: a Social-Psychological Intervention by Geoffrey Cohen, Julio Garcia, Nancy Apfel, and Allison Master, 2006.
- c) White Privilege: An Account to Spend by Peggy McIntosh, 2009.
- d) Reducing the Gender Achievement Gap in College Science: a Classroom Study of Values Affirmation by Akira Miyake, Lauren Kost-Smith, Noah Finkelstein, Steven Pollock, Geoffrey Cohen, and Tiffany Ito, 2010.
- e) Debunking Myths about Gender and Mathematics Performance by Jonathan Kane and Janet Mertz, 2012.
- f) *Unconscious Bias* by Caroline Simpson, 2012.
- g) Research Policy: Only Wholesale Reform Will Bring Equality by Brigitte Mühlenbruch and Maren Jochimsen, 2013.
- h) Practical Policies Can Combat Gender Inequality by Douglas Hilton, 2015.
- i) Avoiding Gender Bias in Reference Writing
- j) https://implicit.harvard.edu/implicit/

• Sexual Harassment in the Sciences:

- a) Sexual Harrassment Case Shines Lights on Science's Dark Secret by Michaeleen Doucleff, 2015.
- b) The Shifting Tide of Sexual Harassment in Science by Rachel Feltman, 2016.
- c) How to Stop the Sexual Harassment of Women in Science: Reboot the System by Zuleylka Zevallos, 2016.

2.7 Women Leaders in Business

Math in the Real World: More Than Just a Numbers Game by Sandi Peterson, Group Worldwide Chairwoman, Johnson & Johnson; and Kathy Wengel, Worldwide Vice President, Johnson & Johnson Supply Chain.

2.8 Alicia Boole

- a) The Mathematical Visions of Alicia Boole by Moira Chas
- b) The Princess of Polytopia: Alicia Boole and the 120-Cell by Tony Phillips

2.9 Emmy Noether

Emmy Noether Celebration:

- a) Emmy Noether: Breathtaking Mathematics by Georgia Benkart.
- b) Symmetry and Conservation Law: Noether's Contribution to Physics by Karen Uhlenbeck.
- c) Emmy Noether Lecturer Plaquette commissioned the by International Mathematical Union by Stephanie Magdziak.

3 Outreach Efforts

- Be a Mentor/Role Model: "When you're feeling sorry for yourself, taking care of someone or something else, evan a house plant", Banana Yoshimoto.
- Successful Community Outreach Events during WAM 2016 that Can Be Replicated Elsewhere:
 - a) Attend a local running race and set up a table to teach local high school students how to cut a bagels (there will be lots of free bagels at any running race) into two linked halves: *Mathematically Correct Breakfast*.

WAM at Princeton5K

- b) Show and tell at a local elementary school:
 - a) Betsy Ross Theorem by Yen Duong, Susan Kemboi, Hannah Turner, and Elizabeth Wicks at Princeton Littlebrook Elementary School Science Expo for 4th and 5th graders.
 - b) *Möbius Valentine* by Federica Fanoni, Sarah Mousley, Madeleine Weinstein, and Sunny Xiao at Princeton Littlebrook Elementary School Science Expo for 4th and 5th graders.
- c) Other math activities for kids: Mike's Math Page, Julia Robinson Mathematics Festival.
- WAM16 Participant facebook Page.
